### MSc(RE) majoring in Real Estate Investment and Finance*

### MSc(RE)*

### MSc(RE) majoring in Urban Development*

---

1 The capstone course should be taken in the last semester of a student’s study. If students want to do Dissertation (RECO6020) instead, please consult the Program Director early.

2 There is no guarantee that the elective courses listed here or on the syllabus are offered every year. In the unfortunate event that an elective course cannot be offered (e.g. due to insufficient enrolment), students will have to take another course, which may affect the major they can get.

* Fully accredited by RICS and HKIS’s General Practice and Planning & Development Divisions

^ To meet HKIS requirements, students who have not studied construction technology or taken equivalent courses before should take an additional elective course Building design and construction (RECO7095). Students who wish to know more about the physical features of a building can also take this course.
