

<b>RPG Student Name:</b>	<b>LIN, Lirrey R.K.</b>
Start Date:	1 September 2022
Supervisor:	Dr. Guibo Sun
Research interest:	My research is interdisciplinary and falls into the fields of urban planning, political sciences, and sociology. I am interested in multi-stakeholder dialogue, knowledge partnering, and co-creation under urban interventions, specifically urban renewal projects. My work is based on the epistemological standpoint of pragmatism and social construction theory. Triangulating qualitative and quantitative methods provide me insights into conducting locally-based research in Hong Kong.
Teaching and research experience:	Teaching Experience: AFIC1004 On Methods - Tutorial & Mentoring (January, 2023 - ) Research Experience: Master's Thesis - The Role of Walkability in COVID-19 Pandemic: A Comparison between Spatial Patterns and Spatial Hotspots in MTR Station Areas Undergraduate Independent Study #1 - How Will Light Rail Transits (LRT) Contribute to the Development of Cities: An Explanation of the Impacts Using a Socio-Ecological Model (SEM) Undergraduate Independent Study #2 - The Threat of Distracted Walking to Human Health: Is This A Myth?
Key publication:	N/A
